## Profile

Aspiring IT Systems Support Intern with ALX Africa certifications in Software Development. Skilled in troubleshooting hardware/software issues, system administration, workflow automation, and network support. Enthusiastic about learning new technologies and contributing to IT operations.

---

## Education

### ALX Africa – BackendSoftware Development Program (2024)

- Backend Software Development Certificate, however, throughout the journey, I have expanded and elevated my skill set by learning frontend technologies as well, becoming proficient in full-stack development as well as automation tools on [make.com](https://make.com) to equip me with the best skills set to solve various problems.
- 

## Technical Skills

- **IT Support & Systems:** Troubleshooting software & web apps, hardware support basics, user support
- **System Administration:** Linux, basic networking, Git/GitHub
- **Programming & Backend:** Python, Django, REST APIs
- **Frontend:** HTML , CSS, React
- **Automation:** Make.com workflows, API/webhook integration

- **Other:** Problem-solving, analytical thinking, teamwork, adaptability
- 

## Projects

**Workflow Automation System** – Automated repetitive tasks using [Make.com](#), improving efficiency.

**Django REST API Application** – Built secure APIs demonstrating backend support skills and security.

**React Frontend App** – Designed responsive UI consuming REST APIs, improving user experience.

Refer to Attached github link.

---

## Certifications

- **ALX Africa Foundation Certificate** – 2024
  - **ALX Africa Backend Software Development Certificate** – 2024
- 

## Qualifications

- Proactive and reliable, strong problem-solving, analytical, and communication skills
- Ability to work effectively in a team-oriented environment
- Enthusiastic about learning and adapting to new technologies
- Basic knowledge of system administration and IT maintenance practices
- Basic understanding of network security principles and troubleshooting
